

Give your students the best platform for learning.

Your students get:

- > Full version of GAUSS
- > Technical support
- > Price: Free

Why GAUSS in the classroom?

- > **GAUSS speaks math** - The intuitive GAUSS matrix language makes it simple to run pre-built analysis and create custom cutting-edge algorithms.
- > **Interactive computing** - The interactive GAUSS interface provides the feedback and insights to keep students engaged and learning every step of the way.
- > **Unparalleled student support** - You teach the theory while we teach the programming.
 - Interactive screen-sharing sessions.
 - Active user forum.
 - Online tutorials.

- > **Powerful computing** - Tackle the most complex computing challenges with the efficient GAUSS mathematical engine and unlimited multi-threading support.
- > **Data Handling** - Easily move from raw data to results:
 - Load, transform, and analyze with one line.
 - Directly work with CSV, Excel, GAUSS datasets, HDF5, SAS and STATA datasets.
 - Supports datasets too large to fit in memory.
- > **Professional Graphics** - Effortlessly create, edit and share modern, high-quality graphics.
